Why choose a Cushion Master?

Advantages

- ◆ *High Speed*- The eight second cycle time will fill cushions as fast as an operator can load them.
- ◆ *No Vacuum*- This method of cushion filling uses a compressible hopper instead of a vacuum. This avoids noisy plastic liners and produces a longer lasting cushion.
- ◆ *Simple To Use*- The operator places the cushion in the hopper and presses a two hand safety control to lightly compress the cushion. The operator slides the cover over the compressed hopper and a foot pedal is pressed to eject the cushion.
- ◆ *Easy To Change Sizes*- The hand adjustments allow the machine to change sizes in seconds.
- ◆ *Jog Mode*- For odd shaped cushions the jog option is included with all machines for easier filling.

Specifications

Standard voltage: 120 volt or 220 volt, single phase, 60 Hz

Pneumatic requirement: 5CFM @ 90psi

Required Area: 84"L x 60"W

Working Height: 40" standard

Options

- ◆ *Height Adjustment*- The Ergo Lift System raises and lowers the machine to adjust for multiple operators.
- ◆ *Automatic Size Adjustment*- Automatic height and/or automatic width controls increase production time when producing various sizes.
- ◆ *Hoppers*- Choose from three options: galvanized, stainless steel, or Teflon coated.
- ◆ *Top Hopper Brackets*- Use either fiberglass bushings or linear slide bearings.
- ◆ *Specialized Sizes*- We can tailor our machines to meet the needs of your product.

Models and Sizes

Model	Hopper Length	Cushion Width	Cushion Height
CM-110	38" or 50"	13" to 38" 16" to 47" 18" to 53"	2" to 4" 4" to 8" 5" to 10"
CM-130	57"	16" to 47"	4" to 8"
CM-135	57"	16" to 47" 18" to 53" 14" to 68" *	5" to 10"
CM-140	82"	19" to 56"	5" to 10"

*Multi Position- Allows for maximum range of hoppers.
